

3 things to do to begin thinking and working in this direction...

- 1.) What defines success for the person in my position at work? What's the goal? What's the bulls eye on the target for you in your current role?
- 2.) Write down the ideal job description with these parameters in mind...
 - a.) success for a person in your position.
 - b.) The mission of your organization.
 - c.) Your particular skill set.
- 3.) Present these two things to your employer/supervisor...
 - a.) as something to work toward/goal
 - b.) as something to try out for a pre-determined length of time.
